ALERT

Enter or scan medications to check compatibility to your unique DNA, illnesses, known allergies, lifestyle, foods, and existing prescriptions & any over the counter drugs.

DETECT

Get early detection for any genetic variations and report them to your physician or pharmacist.

TRACK

Utilize our powerful App to manage your medications and avoid any potentially harmful drug reactions. Organize medications from multiple doctors and any over-the-counter (OTC) drugs in one place.

REPORT

Send personalized test results and concise healthcare reports to your physicians, family members, or healthcare provider.
